

**Introducing
this year's
most
exciting
new ski**

Featuring the patented new IPC
core and all-glass construction
with pre-impregnated
fiberglass.

MATHERJAH
SERIES 2001

SERIES 2001

Featuring the patented new IPC core and all-glass construction with Pre-impregnated fiberglass. Series 2001 handcrafted slalom skis represent a new level of fiberglass engineering and design.

Maherajah Series 2001 are made from a complex blending of Pre-impregnated glass fibers and precision materials. Pre-impregnated fiberglass is so exact in measurement and tolerance that total structural control and uniformity are achieved in every ski.

The Series 2001 slalom ski is one of the only all glass slalom water ski in the world and features patented construction principles unlike any other water ski ever made.

The heart of a Series 2001 features the IPC core which is founded on the "Box Beam" principle.

Its strength and performance characteristics are truly the beginning of a new era in slalom ski performance.

Maherajah Series 2001 slalom skis are not mass produced. The extra time and care we take to make them is for those who can appreciate the difference.

MAHERAJAH

Designers and manufacturers of handcrafted, personalized water skis for 20 years.

YOUR SKIING SPEED MPH

This Glass Ski has what is important to you the Slalom Skier, namely constant performance. We assure you this because we:

1. Design stiffness in the body and flex at the rear of the ski.
2. Put in exactly the right amount of rocker in each section of the ski.
3. Use Maherajahs proven tunnel concave
4. Shape the ski and position the bindings for PERFORMANCE.
5. Have a 45° bevel with heavy glass thickness so you can tune it to your own performance requirements.

2001 SUPER SKI

The "Top Of The Line" Ski. Includes stainless steel fin, the proven Mr. "M" Binding and Special High Heel. We engrave your name on the fin. Six sizes — 160 to 185 cm. This ski is truly the ultimate in slalom water skis — 2001, the Ski of the Future.

\$172

2001 ADJ. BINDING SKI

Our front adjustable binding is still years ahead. This ski is designed to perform — like all Maherajahs — and still permit size flexibility. This superior performance comes from maintaining the critical balance point at all times.

\$148

2001 FIXED BINDING SKI

This is the ski with the binding sized to your foot. Get this ski of the future, sized for your weight and speed and with your own binding, built for the future. Equipped with Competition Front Binding, Back Toe Binding and the New Rubber Cap Fin.

\$136

As in all Maherajah Water Skis, you have the option to include a Stainless Steel Fin, Special High Heel or Heel Holder on your 2001 Ski of the Future. These options are at slight added cost.
